TERMS OF SALE

TERMS OF PAYMENT—Prices listed here are based on cash payment. Cash with order for immediate shipment. Booking order will be accepted when accompanied by remittance covering 25% of purchase amount; the balance to be payable at time shipments demanded. Shipment may be made C. O. D. for balance when one-fourth of the amount of purchase paid with the order. Be sure to include sufficient amount to cover the postage, if you want shipment made by parcel post.

TRANSPORTATION—State whether order is to be shipped by parcel post, express or freight. When no instructions are given, shipment will be made, using our best judgment. Our responsibility ceases upon delivery to forwarding companies; claims for losses or damages must be made upon the latter.

ALL QUOTATIONS are immediate acceptance, subject to stock being sold. We shall not be subject to any liability should injury befall stock from freeze, fire or any other cause beyond our control.

WE GUARANTEE all stock sent out to be well grown, healthy, true to name and properly packed. Our liability under the foregoing guaranty is limited in amount to original price received.

CLAIM—If, by any possibility, errors should occur, they will be promptly rectified, if claim is made immediately after the receipt of the goods.

TO OUR CUSTOMERS

We take this opportunity to sincerely thank you for your support of our business, which has been growing very rapidly year after year. In return we have constantly offered stock of highest quality with best service for lowest price possible. To meet your demand satisfactorily our capacity has been enlarged, and efficiency increased every season; yet we see it takes more ground and space than we have now prepared for the next season, as our propagation of both Coniferous and Broad-leaved Evergreens has turned out more successfully than our expectation. We must vacate, therefore, some particular patches without delay, and have decided to dispose of some of the stock at real bargain prices. For this reason (and not to compete against the other nurseries) we offer in this catalogue much reduced prices; some of them probably below cost. Hope our customers, old and new, will take advantage of this opportunity and give us orders which will be filled with quality, service and value, together with promptness.

Thanking you again for your past patronage and soliciting your further orders in future, we beg to remain,

Yours very truly,
OVERLOOK NURSERIES.

LINING OUT STOCK

Plants under this heading may be the one growing in the field, in plant bed under lath shade, in cutting bed, in seed bed, or in pot.

All plants, with exception of potted ones, will be carefully dug in bare root, trying not to injury any part of it, puddled immediately and packed with properly moistened moss, so to reach destination fresh with original dampness. Plants in pots are to be taken out from the pots and wrapped separately in paper, giving all original dirt However, if so preferred dirt may be shaken off and wrapped in paper with moistened moss The work will be done with our utmost care that customers will receive the plants in just same conditions as shipped with dirt. So doing you save much on expressage and we a part of packing expense; 5% discount allowed for this account of our part.

REMARKS: (C) indicates from Cutting; (S) Seedlings, (G) Grafting, (T) Once Transplanted, (TT) Twice Transplanted.

LINING OUT CONIFERS

ABIS FIRMA (Japanese Fir)

Rather slow but steady grower. This variety does fairly well even in the South.

	10	100	1000
6-8 inch (S), 3-4 yrs.	$1.00	$ 7.50	
8-10 inch (S), 3-4 yrs.	1.50	12.00	
10-15 inch (S) (T), 3-4 yrs.	2.00		

CEDRUS DEODARA

4-6 inch (S)	.75	5.00	
6-8 inch (S)	1.25	8.50	
8-12 inch (S) (T), 2 yrs.	1.50	12.00	
12-18 inch (S) (T), 2 yrs.	2.00		

CHAMAECYPARIS LAWSONIANA ALUMI (Blue Lawson Cypress)

A most beautiful Lawson Cypress with deep blue colored compact foliage. Thrive at the South as well as up the North.

4-6 inch (C) (T)	1.00	7.50	
6-8 inch (C) (T)	1.25	9.50	
8-12 inch (C) (T)	1.50	12.00	

CHAMAECYPARIS LAWSONIANA ARGENTEA (Silver Lawson Cypress)

Similar to Alumi, but leaves are rather whitish and finer texture.

	10	100	1000
4-6 inch (C) (T)	1.25	10.00	
6-8 inch (C) (T)	1.50	12.00	

CRYPTOMERIA JAPONICA VAR YOSHINO (C. Lobbii)

Listed here under the name of Yoshino, but it totally resembles to Cryptomeria Lobbii which is esteemed very highly by Northern or Eastern gardeners. It has much finer leaves and more compact character than common Cryptomeria Japonica. It has been thriving well in our nursery ground where common Cryptomeria Japonica proved to be failure. We recommend this variety to Southern nurserymen as strongly as to Northern gardeners.

6-8 inch (C) (T)	1.75	15.00
8-10 inch (C) (T)	2.50	

CUNNINGHAMIA LANCEOLATA (Chinese Fir)

It closely resembles to Araucaria but the foliages are narrower, brighter green and less rigid. It has very much more resisting power against cold than Araucaria; it stands the zero weather! Stately and graceful appearance will be given in both individual and group plantings. This is only variety in fir-like conifer, thrives well in the South. Very vigorous grower.

4-6 inch (C) (T)	1.00	6.00
6-8 inch (C) (T)	1.25	9.00

CUPRESSUS SEMPERVIREN PYRAMIDALIS (Royal Italian Cypress)

We offer here only those propagated by cuttings from typical narrow, compact, columnar trees.

6-8 inch (C) (T)	1.25	9.00
8-10 inch (C) (TT)	1.50	12.00

CUPRESSUS TORULOSA MAJESTICA (Bhutan Cypress)

A fast growing pyramidal conifer from Himalayas. It grows in a dense, broad pyramidal shape with light green foliages.

6-8 inch (C) (T)	1.50

JUNIPERUS CHINENSIS ALBO-VARIEGATA

Dwarf and very comfact growth, with numerous creamy white tips and branchlets scattered over the plant. Rather slow grower but exceedingly attractive appearance.

	10	100	1000
6-8 inch (G) (TT), 2 yrs.	3.00		

JUNIPERUS CHINENSIS COLUMNALIS

This particular variety was introduced from China. It reaches approximately 20 feet in height. Vary narrow columnar shape with very compact growth. There are two kinds in existence, one green and the other blue. Ours is the one with blue foliage, and grafted.

6-8 inch (G) (TT), 2 yr.	3.50
8-10 inch (G) (TT), 2 yr.	4.50
10-15 inch (G) (TTT), field grown B&B	7.50

JUNIPERUS CHINENSIS FEMINA

(J. Japonicas Sylvestris)

Loosely pyramidal with uniquely spreading branches. Foliage somewhat feathery. Very hardy; thrives well in South as well as in North.

2-4 inch (C) (T)	1.25
6-8 inch (G) (TT)	4.00

JUNIPERUS CHINENSIS MASCULA

Somewhat similar to J. Femina but branches straight and upright and more compact with bluer-green foliage. Very hardy.

3-5 inch (C) (T)	1.25

JUNIPERUS CHINENSIS PFITZERIANA

(Pfitzer Juniper)

One of the best low growing junipers. Very popular all over the country.

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.50	12.00

JUNIPERUS CHINENSIS JAPONICA

Exactly the same as Juniperus Chinensis Procumbens, with exception that this variety has both scale and needle-like foliages and slightly lighter green color instead of bluish green of Procumbens. It thrives very well in the South. Our parent plant is covering space more than one hundred square feet by single plant.

4-6 inch (C) (T)	1.25	9.00

JUNIPERUS CHINENSIS PROCUMBENS (Trailing Juniper)

Best known of the prostrate creeping juniper. Dense mat of blue-green foliage. Extremely hardy.

	10	100	1000
4-6 inch (C) (T), 2 yr.	1.25	9.00	
6-8 inch (C) (T), 2 yr.	1.50	12.00	
8-12 inch (C) (TT), field grown	2.50	20.00	

JUNIPERUS CHINENSIS SARGENTI

One of the best newly introduced ornamentals from the Orient by Prof. Sargent. Foliages and twigs are much finer than those of Procumbens. We offer here blue strain.

2-4 inch (C) (T)	1.50		

JUNIPERUS COMMUNIS (English Juniper)

Being propagated by cuttings from best shaped trees of choicest specimens, ours are in uniform of medium broad symmetrical pyramidal shape.

4-6 inch (C) (T)	1.00	8.00	
6-8 inch (C) (T)	1.25	10.00	
8-12 inch (C) (T)	1.50		

JUNIPERUS COMMUNIS ASHFORDI

Similar to the last, but columnar in habit. Compact and narrow growth.

4-6 inch (C) (T)	1.00	8.00	
6-8 inch (C) (T)	1.25	10.00	
8-12 inch (C) (T)	1.50		
8-12 inch (C) (TT), field grown	2.00		

JUNIPERUS COMMUNIS COLUMNALIS (Columnar English Juniper)

Our strain is strictly columnar, just like Royal Italian Cypress. Plant in height of 6-7 feet has only 8-10 inches of diameter in its width, without having any shearing. Very compact growth with silvery green foliage. Very hardy and thrives well even in the section where Irish juniper generally fails to grow. We recommend this variety most highly.

4-6 inch (C) (T)	1.25	9.00	
6-8 inch (C)(T)	1.50	11.00	

JUNIPERUS COMMUNIS DEPRESSA
(Canadian Juniper)

A low spreading Juniper. Very hardy and rapid grower. Ours being propagated by cuttings from best shaped specimens they are far superior to those of seedling.

	10	100	1000
4-6 inch (C) (T)	1.00	8.00	
6-8 inch (C) (T)	1.25	10.00	

JUNIPERUS COMMUNIS DEPRESSA AUREA
(Golden Canadian Juniper)

A most beautiful prostrate juniper! The shape and habit are similar to that of green Canadian Juniper, but its brilliant golden color, especially when new growth come forth, gives most distinct appearance of beauty.

2-4 inc h(C) (T)	1.25	9.00
4-6 inch (C) (T)	1.50	12.00

JUNIPERUS CONFERTA (Shore Juniper)

A low prostrate juniper with slender, spreading branches. Foliage, willow-green in color. It thrives well in seashore, particularly in sandy soil. However, it grows nicely also at interior.

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.25	10.00

JUNIPERUS EXCELSA STRICTA
(Spiny Greek Juniper)

Well known dwarf variety in conical shape. Grows rather slow but very hardy.

3-5 inch (C) (T)	1.25	9.00
5-8 inch (C) (T)	1.75	13.00
8-12 inch (C) (TT) field grown	3.50	30.00

JUNIPERUS HORIZONTALIS DOUGLASI
(Waukegan Juniper)

A low compact creeping juniper making a soft mat of foliage, bluish in growing season and purplish in winter.

3-5 inch (C) (T) 1.50

JUNIPERUS JAPONICA OBLONGA

Semi-upright, with short light green leaves. One of very interesting junipers.

6-8 inch (G) (TT) 4.00

JUNIPERUS VIRGINIA GLAUCA (Silver Juniper)
Known as Silver Juniper. Ours was grafted last spring and grown one year under lath. Can lining out in the field with perfect safety.

	10	100	1000
6-8 inch (G) (TT), 2 yr.	4.00	35.00	
8-12 inch (G) (TT), 2 yr.	5.00	45.00	
8-12 inch (G) (TT), 3 yr. bushy	6.00	55.00	
12-18 inch (G) (TTT), 3 yr., field grown, B&B	8.00	75.00	

JUNIPERUS ELEGANTISSIMA LEE (Golden Tip Juniper)
A most beautiful juniper. Especially so when new growth, which is rich creamy golden color, appears with old green foliages in contrast.

8-12 inch (G) (TT), 2 yr.	5.00	
12-18 inch (G) (TTT), 3 yr., field grown, B&B	8.00	

JUNIPERUS VIRGINIA CANNATI
Shape and habit are the same as Glauca but foliages are bright green. It grows well down south as well as up north.

6-8 inch (G) (TT), 2 yr.	4.00	35.00
8-10 inch (G) (TT), 2 yr.	5.00	45.00

JUNIPERUS VIRGINIA KOSTERI
Semi-dwarf. Closely resembles in appearance to Pfitzer Juniper, but grows slightly taller than the other. Spreads naturally with dense foliage of light blue. It also thrives well down south as well as north.

3-5 inch (C) (T)	1.75	15.00
6-8 inch (C) (T)	3.00	25.00
8-12 inch (C) (TT), field grown	4.00	35.00

PINUS DENSIFLORA (Japan Red Pine)

12-18 inch (S), 3 yr.	4.00
18-24 inch (S), 3 yr.	6.00

PODOCARPUS SINENSIS MACROPHYLLA (Large Leaved Japan Yew)
Dark green leaves with upright stem. Thrive well in sunny spot as well as in shady place. Growth of this variety is not so slow as the other yews, particularly our strain is in nature of upright growth and very rapid grower with large leaves.

6-8 inch (S)	1.00	5.00
4-6 inch (C) (T)	1.00	6.00
12-18 inch (C) (TT), 3 yr.	1.75	15.00

PODOCARPUS ELONGATUS (Fern Podocarpus)

Recent introduction and very rare variety. Most beautiful tree of medium size with very narrow light green foliages. Rather tender and not recommendable for outside planting in the sections where temperature goes down below 25 degrees F. However, very much desirable as pot plant.

	10	100	1000
3-5 inch, in 2½ inch pots	1.50	12.00	

PODOCARPUS NAGI

Another rare variety of Podocarpus family. Leaves are broad as if broad-leaved evergreen, very thick, leathery and glaucous in color. Appearance and growth resemble very much to Black Acacia. Not very hardy.

3-5 inch in 2½ inch pots	1.50	12.00

RETINOSPORA DECUSSATA (Column Retinospora)

A tall columnar retinospora with gray-green foliage. Very rapid grower.

4-6 inch (C) (T)	1.00
6-8 inch (C) (T)	1.25

RETINOSPORA FILIFERA (Thread Leaved Retinospora)

A graceful compact evergreen with drooping thread-like leaves and branches. Very hardy and decorative.

4-6 inch	1.00	8.00
6-8 inch	1.25	10.00

RETINOSPORA FILIFERA AUREA (Golden Thread Leaved Retinospora)

A graceful compact evergreen connfer with pendulous thread like branches. Its golden color is exceptionally attractive.

3-5 inch (C) (T)	1.25	10.00
6-8 (C) (TT), 2 yr.	2.00	15.00
8-12 inch (C) (TT), 3 yr.	3.00	25.00

RETINOSPORA LEPTOCLADA

Entirely different from Retinospora Seiboldi, which is called by Western nurserymen R. Leptoclada. Dwarf and rather slow grower, short branches and very compact appearance. Leaves very small but not like scale, rather resemble to R. Obtusa Nana. Grayish green in spring and summer and turns purple in winter. Very desirable variety.

3-5 inch (C) (T)	1.00	8.00
5-7 inch (C) (T)	1.25	10.00

RETINOSPORA OBTUSA CRIPPSII
(Hinoki Cypress)

Rather dwarf, fine smooth leaves in light green color to yellow green at winter.

	10	100	1000
4-6 inch (C) (T)	1.00	8.00	

RETINOSPORA OBTUSA CRIPPSII AUREA

Semi-dwarf. One of the most unique golden conifers with graceful fern-like foliages. The outer tips of all branchlets shading into golden yellow.

4-6 inch (C) (T)	1.25	10.00
6-8 inch (C) (T), 2 yr.	1.50	12.00
8-12 inch (C) (TT), 3 yr.	2.50	

RETINOSPORA OBTUSA GRACILIS
(Graceful Hinoki Cypress)

Tall growing Hinoki Cypress with larger and coarser branchlets, leaves of which hold shiny, waxy green all year round. Most desirable for foundation planting, individual setting as well.

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.25	10.00

RETINOSPORA OBTUSA NANA COMPACTUM

Dwarf Japanese Cypress. Very dense foliage with bright green color. Very compact grower. One of the best dwarf varieties.

2-4 inch (C) (T)	1.75	15.00
4-6 inch (C) (TT)	3.00	25.00
6-8 inch (C) (TT) 3 yr.	4.00	35.00

RETINOSPORA PISIFERA AUREA
(Golden Sawara Cypress)

Strong growing, rather open habit, pyramidal form, graceful golden foliage.

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.25	10.00

RETINOSPORA PLUMOSA (Green Plume Cypress)

Rapid grower, with foliage arranged in billowy plumes of a rich green. Its irregular outline is pleasing in soft artistic taste in landscape. Thrives very well in the Gulf States as well as in Atlantic coast.

6-8 inch (C) (T)	1.00	6.00	50.00
8-12 inch (C) (TT), 2 yr.	1.25	9.00	
12-18 inch (C) (TT) 2 yr.	2.00	15.00	

RETINOSPORA PLUMOSA AUREA
(Golden Plume Cypress)

Similar to the above but its new growth is decidedly golden and very attractive. It grows somewhat slower than green Plumosa.

	10	100	1000
4-6 inch (C) (T)	1.00	6.00	50.00
6-8 inch (C) (T)	1.25	8.00	70.00
8-10 inch (C) (TT), 2 yr.	1.50	10.00	
10-15 inch (C) (TT), 2 yr.	2.00	15.00	

RETINOSPORA PLUMOSA ARGENTEA
(Silver Tip Dwarf Plume Cypress)

Silver tipped retinospora of extremely compact and very dwarf growth. Its being in shape of perfectly globular, most suitable for urn, beside formal planting in garden.

4-6 inch (C) (T)	1.00	7.50
6-8 inch (C) (T)	1.25	9.50
8-12 inch (C) (T)	2.50	12.00

RETINOSPORA PLUMOSA GLAUCA

Changed back from R. Squarrosa Veitchii but holds typical type and character of R. Plumosa. Colors: silvery blue-green, very beautiful.

4-6 inch (C) (T)	1.50

RETINOSPORA PLUMOSA SULPHUREA

It resembles to R. Plumosa Aurea, but leaves are finer and color of new growth more whitish yellow.

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.25	10.00

RETINOSPORA SQUARROSA SIEBOLDI
(Andely Cypress)

A broad pyramidal with fine juniper-like blue-green foliage.
foliage.

2-4 inch (C) (T)	1.00	7.00
4-6 inch (C) (T)	1.25	9.00

RETINOSPORA SQUARROSA VEITCHII

Pyramidal but irregular outline together with fine soft foliage of silvery blue green arranged in billowy masses like clouds of smoke gives highly artistic effects to your garden.

4-6 inch (C) (T)		6.00	50.00
6-8 inch (C) (T)	1.25	8.00	70.00
8-10 inch (C) (T), 2 yr.	1.50	10.00	
10-15 inch (C) (TT), 2 yr.	2.00	15.00	

THUJA ORIENTALIS (Chinese Arbor Vitae)

	10	100	1000
4-6 inch (S)		2.00	15.00
6-8 inch (S)		2.50	20.00
8-12 inch (S)		3.00	25.00

THUJA ORIENTALIS AUREA CONSPICUA
(Goldspire Arbor Vitae)

The best golden pyramidal type yet introduced. Tall and erect with intense golden foliage. Very hardy.

8-10 inch (G) (TT)	3.00	25.00

THUJA ORIENTALIS AUREA NANA
(Berckman's Golden Arbor Vitae)

We propagate only by cutting or grafting with scions from true Berckman's Golden and absolutely true to type.

4-6 inch (C) (T)	1.25	9.00
6-8 inch (C) (T)	1.50	11.00

THUJA ORIENTALIS BAKERIE

Prettiest of all pyramidal arbor vitaes. Pleasing bright green color, retaining whole summer and winter.

2-4 inch (C) (T)		6.00
4-6 inch (C) (T)	1.25	9.00
6-8 inch (C) (T)	1.50	11.00

THUJA ORIENTALIS BONITA

Compact, dwarf cone-shaped, with foliages of rich green color which remains unchanged through the year.

4-6 inch (C) (T)	1.25	9.00
6-8 inch (C) (T)	1.50	11.00

THUJA ORIENTALIS COMPACTA

Closely resembles to Bonita but broader and more globular in shape. It grows in most any soil and location.

4-6 inch (C) (T)	1.25	9.00
6-8 inch (C) (T)	1.50	11.00

THUJA ORIENTALIS GLAUCA
(Blue Green Arbor Vitae)

Commonly called blue-green arbor vitae. Closely resembles to Rosedale Hybrid, but color of the foliage is slightly deeper blue. Grows satisfactory in the South.

4-6 inch (C) (T)	1.25	9.00
6-8 inch (C) (T)	1.50	11.00

THUJA ORIENTALIS RAMSEY'S HYBRID

Fast growing arbor vitae with stout, erect branchlets. Thread-like leaves in dark green color. Stands well against drouth and heat as well as cold. The larger it gets the more handsome it becomes.

	10	100	1000
5-7 inch	1.75	15.00	

THUJA ORIENTALIS ROSEDALE

4-6 inch (C) (T)	1.00	8.00	
8-10 inch (C) (TT), field grown	2.00	15.00	

THUJA ORIENTALIS TEXANA GLAUCA

Strong and rapid grower. Tall and slender with blue foliage.

4-6 inch (C) (T)	1.25	9.00	
6-8 inch (C) (T)	1.50	11.00	

LINING OUT BROAD LEAVED EVERGREEN

	10	100	1000
ABELIA GRANDIFLORA			
6-8 in. (C) from cutting bed		$3.50	$ 30.00
8-12 in. (C), field grown, bushy		7.00	60.00
12-18 inch (C), field grown, bushy	1.25	10.00	

BERBERIS ATROCARPA (Evergreen Berberry)
It resembles very much to Barberry Sargentii, though this variety could not stand severe cold but very fast grower and is well adapted for the south.

4-6 inch, from cutting bed		4.00	30.00
4-6 inch (C) (T)		6.00	
6-8 inch (C) (T)	1.25	9.00	
8-12 inch (C) (T)	1.50	12.00	
12-18 inch (C) (TT)	3.00	25.00	

BOTTLE BRUSH (Callistemen)
A beautiful low headed evergreen shrub. Bright red flowers in cylindrical brush-like spikes opening at spring, and sometimes in fall again.

8-10 inch (C) ,2½ inch pots	2.00	15.00
10-15 in. (C), 3 inch pots	2.50	20.00

BOUGAENVILLEA, CRIMSON LAKE
The best of Bouganvillea. Very rich brilliant crimson-like color and more profuse bloomer than any other variety. Florists grow it in pot for holiday trade, while in Southern Florida and Southern California raised outside for climbing vine.

4-6 inch, 2½ inch pots	1.50	12.50
6-10 inch, 3 inch pots	2.50	20.00
10-18 inch, 4 inch pots	4.50	40.00

BUXUS JAPONICA
In the South this variety is much preferred to English Boxwood (Buxus Sempervirens) as it stands the hot southern sun and grows much faster.

3-5 inch (C) (T)		5.00
5-8 inch (C) (T), 2yr.	1.25	10.00

BUXUS SEMPERVIRENS (English Boxwood)

4-6 inch (C) (T)		5.00
6-8 inch (C) (TT), 2 yr.	1.00	8.00
8-12 inch (C) (TT), 3 yr.	1.50	12.00

CAMELLIA JAPONICA (Double Flower, Assorted Colors, Strictly Separated)

One of the most popular plants in the Gulf Coast region, with glossy green foliage and attractive flowers at winter when no other blossoms found in garden. Very dense and symmetrical in its growth. Propagated only by cuttings taken from the specimens in merit. All colors separated that are white, red, pink and several different types and colors of variegation. All double flowers.

	10	100	1000
3-5 inch, from cutting beds	1.00	8.00	
4-6 inch (C), 2½ inch pot, (spring delivery)	2.00	15.00	
6-10 inch (C), 2½ inch pot	3.00	25.00	
10-12 inch (C), 3 inch pot	4.00	35.00	
12-15 inch (C) ,3 inch pot	5.00	45.00	
15-18 inch (C), 4 inch pot	7.50	70.00	

CAMELLIA JAPONICA (Seedling)

Most suitable evergreen border. Flowers mostly single but abundant. Foliage very dark glossy green, much less trouble with scale. Grows considerably faster than double flowering camelias and thrives even under unfavorable conditions. Usable also stock for grafting.

3-5 inch (S)		6.00
5-8 inch (S), 2 year old	1.25	10.00
8-12 inch (S), 2 year old	1.75	15.00

CAMELLIA SASANQUA (Double White Flower—Mimeno-yuki)

Smaller leaved in camellia family. It gives more shrubby effects and softer taste to landscape gardening. Vigorous grower and free from scale. Blooms in October and November.

3-5 inch from cutting bed	1.00	7.00
4-6 inch (C) (T)	1.50	10.00
8-12 inch (C) (T)	2.00	15.00
12-18 inch (C) (T)	2.50	20.00

CAMELLIA SASANQUA (Single Flower, White, Pink and Both Mixed)

3-5 inch from cutting bed		6.00
4-6 inch (C) (T)	1.25	9.00
8-12 inch (C) (TT), 2 yr.	2.00	15.00
12-18 inch (C) (TT), 2 yr.	2.50	20.00

CAMELLIA THEA (Tea Plant)

Sweet scented flower in late fall. A fine evergreen shrub.

6-8 inch (S)		4.00
8-10 inch (S)	.75	6.00

CASSIA FLORIBUNDA (Evergreen Flowering Senna)

Evergreen senna. A shrub of medium height, bearing a profusion of bright yellow flowers throughout late summer and fall. Hardy at the Gulf Coast and Florida.

	10	100	1000
12-18 inch (S), field grown	1.50	12.00	

CINNAMOMUM LAURERII (Real Cinnamon Tree)

Real Cinnamon tree. Closely resembles to Camphor. Very desirable evergreen, particularly at the Gulf Coast region.

8-10 inch (S), 2 yr.	1.25	10.00
10-12 inch (S), 2 yr.	1.50	12.50

CLEYERA JAPONICA

A splendid evergreen shrub with thick glossy leaves and creamy white fragrant flowers. Berries red in winter. An upright grower reaching height of 10 to 12 feet. Ours being propagated by cuttings from best specimens, superior in every respect to those from seed.

4-6 inch (C) (T)	1.25	10.00
8-12 inch (C) (TT)	2.25	20.00
12-18 inch (C) (TT)	3.50	30.00

COTONEASTER PANOSA

One of the well thriving Cotoneasters in the Southern climate. Silvery leaves together with abundant red berries are most attractive.

6-8 inch (C) (T)	1.00	8.00
8-12 inch (C) (T)	1.50	12.00

COTONEASTER FRANCHETI

A tall conical plant of upright growth with arching branches. Flower small and pink in color. Berries orange yellow tinged with red. One of hardy varieties in the south.

6-8 inch (C) (T)	1.00	8.00
8-12 inch (C) (T)	1.50	12.00

CYTISUS SCOPARIUS (Scotch Broom)

Evergreen down south, although the leaves drop the branches stay in dark green color. Upright shrub with slender, erect angular green branches. Yellow pea-like flowers produced solitary along the leafless branches at spring.

8-12 inch (S)		5.00
12-18 inch (S)	1.00	8.00

ELAEAGNUS PUNGENS VARIEGATA (Yellow Edge Elaeagnus)

ELAEAGNUS PUNGENS MACULATA (Yellow Center Elaeagnus)

Both of them variegated, but one has yellow center with dark green margin, the other yellow edge and green center that will not be changed by sun nor cold. Most beautiful evergreen shrub among other dark green shrubs.

	10	100	1000
4-6 inch (C) (T)	1.25	10.00	
6-8 inch (C) (T)	1.50	12.00	
8-12 inch (C) (T)	1.75	15.00	
12-18 inch (G), field grown	3.00	25.00	
18-24 inch (G), (T), field grown	3.50	30.00	

ELAEAGNUS PUNGENS

Shiny green leaves with silvery beneath.

ELAEAGNUS PUNGENS REFLEXA

Branches in drooping and spreading character. Leaves scaly beneath with bronze color. Very useful landscape decoration.

ELAEAGNUS PUNGENS SIMONI

Leaves large and more roundish; hardy and good grower.

ELAEAGNUS PUNGENS JENNY

With shiny large leaves; very desirable variety.

ELAEAGNUS PUNGENS DWARF THORN

Leaves smaller and narrower and more spiny than any above variety. Dwarf and compact and very bushy.

ELAEAGNUS PUNGENS FRUITLANDII

Leaves very large and glossy green with silvery beneath. Very easy and fast grower.

Price of above Elaeagnus varieties:

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.25	10.00
8-12 inch (C) (T), 2 yr.	1.50	12.00
12-18 inch (C) (TT), 2 yr.	2.00	17.50

EUGENIA HOOKERI

Tall tree of pyramidal shape with dark glossy green foliage, young growth being bronzy hue. Flower creamy white. Fruit borne in large cluster. Very vigorous grower and tender. Florida and California are only states able to raise this plant outside.

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.25	10.00

EUONYMUS CARRIERI

Similar to Euonymus Radicans but not creeper. Leaves shiny green, but some times turn to bronze color after severe frost. It grows well in sun as well as in shade; very hardy.

	10	100	1000
6-8 inch (C) (T)	.50	3.00	
8-12 inch (C) (T)	.75	5.00	
12-18 inch (C) (T)	1.00	8.00	

EUONYMUS PATENS (E. Sieboldi)

Broad and more spreading habit in growth. Said semi-evergreen in the north, but leaves stay green entire winter in the southern states. Brilliant scarlet berries in fall are most attractive. Absolutely hardy.

4-6 inch (C) (T)	.75	5.00
12-18 inch (C) (T)	1.25	

EUONYMUS RADICANS, E. R. VARIEGATA and EUONYMUS KEWENSES (Baby Winter Creeper)—Description and prices will be found under heading "VINES."

FATISIA JAPONICA

Much resembles to Aralia Spinosa, but this is evergreen and stand much colder temperature without losing leaves. Foliage large and glossy shiny green with shape of five fingers spread. There is not many trees or shrubs in existence grow in entirely shady place, but this Fatisia thrives better in such location where most of the others cannot grow. Newly introduced, very attractive plant.

4-6 inch (S) (T)	1.50	12.00
6-8 inch (S) (T)	1.75	15.00

FEIJOA SELLOWIANA (Pineapple Guava)

Compactly growing shrub. Leaves green with silverly underneath. One of most desirable plants for the Gulf Coast.

6-8 inch (C or S)	1.00	8.00
8-12 inch (T)	1.50	10.00

GARDENIA FLORIDA (Cape Jasmine)

Well known evergreen shrub under the name of Cape Jasmine. Leaves large glossy dark green. Flowers large double, pure white. Very highly scented. Hardy outdoor plant as far north as Nashville.

4-6 inch from cutting bed		3.00	25.00
6-8 inch (C) (T)	.75	5.00	40.00
8-12 inch (C) (T)	1.00	7.00	

OVERLOOK NURSERY - 1950

CRICHTON ALA.

GARDENIA RADICANS (Creeping Cape Jesmine)
It grows not over a foot high but spreads 3 to 4 feet. Rather creeping character. Flower double white, very fragrant. Leaves small and shiny glossy green. A very plant for rock garden. Doubtlessly suitable to florists for Mother's Day trade as well as that of Memorial Day.

	10	100	1000
2-4 inch, from cutting bed		3.00	
3-5 inch (C) (T)	.75	6.00	
6-8 inch (C) (TT), in 3 inch pots	2.00	15.00	

GARDENIA STRICTA NANA (Dwarf Cape Jasmine)
Closely resembles to Gardenia Florida but smaller. Very dwarf compact growth. Most ideal for pot plant or border.

4-6 inch (C) (T)	1.00	7.00

GARDENIA VEITCHII (Winter Blooming)
Winter blooming gardenia. This is the very variety Eastern florists estimate very highly for winter cut flowers. We have this year only small size to offer.

4-6 inch (C), 2½ inch pots	2.00	15.00

HIBISCUS ROSA SINENSIS
(Single red, double red and peachblow)

4-6 inch (C), 2½ inch pots	1.00	6.00
8-12 inch (C), 3 inch pots	1.50	12.00
10-15 inch (C), 4 inch pots	2.50	20.00

ILEX CORNUTA (Chinese Spiny Holly)
Spiny dark green leaves with scarlet berries in winter. We have this year only small supply of this stock.

3-5 inch (C) (T)	1.50	12.50
6-8 inch (C) (T)	2.00	

ILEX CRENATA (Japanese Dwarf Holly)
A much branched evergreen shrub, with oval, crenate leaves. A splendid specimen and also desirable for hedge planting.

2-4 inch (S)	3.00	25.00

ILEX CRENATA ROTANDIFOLIA (Round Leaved Japanese Dwarf Holly)
Similar to I. Crenata but leaves are larger and roundish.

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.50	12.50
8-12 inch (C) (T)	1.75	15.00

ILEX CASSINE (Dahoon Holly)

A popular evergreen, being native to northern Florida. Leaves have no spine and dark, shiny green. Much resembles to Ilex Integra. Producer of bright red berries in abundance. Supply very limited.

	10	100	1000
4-6 inch (C) (T)	1.50		

ILEX INTEGRA

A beautiful evergreen. Leaves oblong with taping point, shiny dark green. White flowers at May and beautiful red berries in winter.

3-5 inch (C) (T)	1.50	12.00

ILEX LATIFOLIA (Big Leaved Holly)

Hardy evergreen shrub. Leaves oval to oblong-lanceolate, very thick, serrate, glossy green above, very large—sometimes reaches 7 inches long and 3 inches wide. Small flower at May and cluster of red berries at winter.

4-6 inch (C) (T)	1.75
8-10 inch (C) (TT)	3.00
10-15 inch (C) (TT)	5.00

ILEX OPACA

Well known native evergreen, growing everywhere wild. However, this wild plant is hard to be transplanted successfully. Moreover, it bears no berry in many cases. Our propagation was done by cuttings secured from best berry-bearing specimen and guaranteed to bear.

From cutting bed	1.00	7.00
4-6 inch (C) (T)	1.50	12.00
6-8 inch (C) (T)	1.75	15.00

ILEX ROTANDA

This is the variety considerably different from Ilex Crenata Rotandifolia. The leaves are much larger but thinner. Very rapid grower, being introduced by U. S. Government from China.

4-*6 inch (C) (T)	1.25	10.00

ILEX VOMITORIA FEMINA (Berry Bearing Yaupon)

Ours propagated strictly by cuttings from heavily berried specimens.

From cutting bed	1.00	7.00
4-6 inch (C) (T)	1.50	12.00
12-18 inch (C) (TT)	2.50	

ILLUCIUM ANISATUM

A handsome hardy broad leaved evergreen shrub or small tree. Smooth entire, light green foliage, anise scented when bruised. Narrow and upright in habit of its growth; very hardy.

	10	100	1000
2-4 inch (S)		5.00	
8-12 inch (S)	1.50	12.00	
12-18 inch (C) (TT)	2.00		

JASMINUM FLORIDUM

Hardiest evergreen jasmine, with very dark glossy foliage in graceful arching branches. Very attractive. Yellow flowers in cluster.

6-8 inch (C) (T)	.75	5.00

JASMINUM HUMILE

A tall shrub, reaching 7 to 8 feet in upright growth. Leaves are much larger than that of J. Floridum. Yellow flowers in spring and fall. Hardy as far as Washington, D. C.

6-8 inch (C) (T)	.75	5.00

JASMINUM PRIMULINUM (Primrose Jasmine)

Evergreen shrub with thick green leaves on arching branches. Bright yellow flowers in spring. Very vigorous grower.

6-8 inch (C) (T)	.75	4.00

LAUROCERASUS CAROLIANA (Cherry Laurel)

A well known native evergreen. Compact glistening green foliage of medium size. Very attractive as foundation planting, especially in large estate or in park. It also is effective for formal planting when sheared in standard, pyramidal or other shape.

4-6 inch (S)		3.00
6-8 inch (S)		5.00
12-18 inch (S), 2 yr.	1.25	10.00

LAUROCERASUS OFFICINALIS (English Laurel)

Medium to large spreading shrub with broad shiny rich green foliage. One of most useful plants for southern planting. We have in our stock the following four varieties:

Augustifolia—Leaves very long and narrow, very thick and dark green. More upright grower.

Latifolia—Leaves dark shiny green, much larger and wider than Augustifolia, thick almost entire.

Rotundifolia—Leaves short and wide and roundish, slightly thinner and light green in color.

Schipkaensis—Leaves are much smaller and very thick, dark green above and very light green beneath. Very compact grower. This is hardest of all English Laurels, growing successfully in the State of New York.

	10	100	1000
4-6 inch (C) (T)	1.25	8.00	
6-8 inch (C) (TT)	1.50	12.00	

LAURUS NOBILIS (Grecian Bay)

A beautiful evergreen with glossy dark green leaves which are very aromatic and used in cooking. This shrub thrives very well on the Gulf Coast. Can be sheared to any shape you may prefer.

4-6 inch (C) (T)	1.00	8.00
6-8 inch (C) (T)	1.25	10.00
8-12 inch (C) (TT)	1.75	15.00
12-18 inch (C) (TT)	2.50	20.00

LIGUSTRUM CILIATUM VARIEGATUM (Iwaki Privet)

Compact grower, rather small, thick, roundish. Leaves faintly blotched with pale yellow. Although this is not quite so hardy as some of the other Ligustrums, undoubtedly best dwarfed and compact privet in the South.

From cutting bed		3.00
4-6 inch (C) (T)	.75	5.00
12-15 inch (C) (T)	1.25	9.00

LIGUSTRUM JAPONICUM AUREAUM MARGINATUM (Golden Tip Japan Privet)

Much deeper yellow margin on young growth. Bore heavily with purple berries in winter. Contrast wtih leaves in colors admirable.

LIGUSTRUM JAPONICUM MACROPHYLLUM

A greatly improved strain of Ligustrum Japonicum. Distinguished by exceedingly large thick glossy leaves. The true type and form could only be obtained by grafting.

Prices for the above two varieties:

12-18 inch, grafted, field grown	2.50	20.00
18-24 inch, grafted, field grown	3.00	25.00
24-30 inch, grafted, field grown	3.50	30.00

LIGUSTRUM JAPONICUM EXCELSUM SUPERBUM

Best of all Japan privets. Leaves variegated with creamy white. Contrast with other green foliages gives exceedingly good effects to view of the garden. Supply limited. Order early.

	10	100	1000
12-18 inch, grafted, field grown	3.00	25.00	
18-24 inch, grafted, field grown	3.50	30.00	
24-30 inch, grafted, field grown	4.00	35.00	

LIGUSTRUM LUCIDUM COMPACTUM (True Waxy Privet)

Our strain is in extra dense compact growth with very dark waxy green thick leaves. Very hardy and thrives in most any kind of soil with no particular attention for care. Indeed this is most satisfactory plant for general planting.

LIGUSTRUM LUCIDUM PYRAMIDALIS (Upright Waxy Privet)

Its growth is decidedly erect and narrow in form. Leaves dark green and glossy but rather pointed at end and not quite so thick as Compactum.

LIGUSTRUM REPANDA (Crinkled-leaf Privet)

Closely resembles to Ligustrum Pyramidalis but leaves narrow and crinkled.

From cutting bed		3.00	25.00
4-6 inch (C) (T)		4.00	35.00
6-8 inch (C) (T)	.75	5.50	45.00
8-12 inch (C) (T)	1.00	7.50	65.00
12-15 inch (C) (T)	1.25	9.00	80.00
12-18 inch (C) (T), field grown, very bushy	2.00	15.00	140.00
18-24 inch (C) (TT), field grown, very bushy	3.00	20.00	180.00

LIGUSTRUM LUCIDUM GRACILIS (Griffing)

A tall slender shrub with strong upright branches. Leaves pointed, thick, shiny and dark green. This variety and Black Leaf are two darkest green leaved species of all Lucidums.

LIGUSTRUM LUCIDUM BLACK LEAF (Griffing)

A medium upright type with glossy dark green heavy foliages. It holds darkest green color under any environment.

LIGUSTRUM LUCIDUM ERECTA (Griffing)

One of pyramidal waxy privets, but this strain shows narrower type than ordinary pyramidalis. Prices for the above three varieties:

	10	100	1000
From cutting bed		4.00	
4-6 inch (C) (T)	.75	5.00	
6-8 inch (C) (T)	1.00	6.50	
8-12 inch (C) (T)	1.25	8.50	
12-15 inch (C) (T)	1.50	10.00	
12-18 inch (C) (TT), field grown	2.50	20.00	
18-24 inch (C) (TT), field grown	3.00	25.00	

LIGUSTRUM CHINENSIS (Amur River Privet South)

12-18 inch (S), field grown		1.50	10.00
18-24 inch (S), field grown		2.00	15.00
2-3 feet (C), field grown, very bushy		3.00	25.00
3-4 feet (C), field grown, very bushy		4.00	30.00

LIGUSTRUM OVALIFOLIUM AUREUM (Manda's Golden Privet)

Golden variegated California privet. Hardy and pretty bush. More showy when planted among green varieties.

4-6 inch (C) (T)		4.00	
8-12 inch (C) (T)	1.00	7.00	
12-18 inch (C) (T)	1.25	10.00	

LIGUSTRUM OVALIFOLIUM LODENS

4-6 inch (C) (T)		3.00	
6-10 inch (C) (T), field grown		6.00	

LIGUSTRUM IONANDUM

Recent introduction by an agricultural explorer. Leaves very small, like boxwood. On account of its dwarfness most desirable for low hedge or border planting.

6-8 inch (C) (T)	1.00	6.00	
8-10 inch (C) (T)	1.25	8.00	

LONICERA PILEATA

Dwarf shrub with boxwood like foliage. Most suitable for low border or rock garden.

4-6 inch (C) (T)	1.00	8.00	

AZALEA INDICA AND HARDY JAPANESE AZALEA (Named Varieties)

City of Mobile has been known last several years to the world as "Azalea City". Besides those already planted many years ago annual plantings in public places and private residences are totaled many times of a thousand. We dare to say there is no floral display equal to that of Mobile in spring when Azaleas in full bloom. No wonder so many visitors pour in this Gulf City from every direction, March to May, simply to see these beautiful views. Azaleas, in contrary to general belief or rather guess, are by no means hard to grow, providing a certain requirement fulfilled. We are in strong belief that Azalea Indica can be raised without any trouble in all Gulf Coast regions and the Atlantic Coast as far north as North Carolina and hardy Japanese Azaleas still further to the state of New Jersey. We earnestly recommend this flowering bush to fellow nurserymen as well as florists in said territories to try more or less like we did years ago. A few cultural suggestions as the following:

1. Azaleas thrive in soil of acidity. Use plenty of leaf mold (oak leaves most desirable), pond muck or peat moss.

2. Lime or alkaline soil is poisonous. In case Azalea to be planed in such a soil remove original soil and use plenty of leaf mold or peat moss mixed with the other soil, no alkali contained or apply Alminum Sulphate at the rate of 4-inch pot full to a wheelbarrowful of soil.

3. As Azalea root system is very shallow it dries fast. Give enough water to keep roots moist always.

4. Azalea delights in a moist soil but it will not tolerate a water saturated soil condition; so Azalea beds should be selected where all surplus water will run off quickly.

5. Azalea thrive best at partly shady place (when the bush grows large it stands in full sunlight) but many good blossoms cannot be expected if planted under entire shade.

6. Azalea is not very gross feeder. If plenty of leaf mold or such rotten organic matter applied on it does not require any commercial fertilizer. On contrary very often heavy application of fertilizer injures the root system. However, if necessary light application of well rotten cow manure, sheep manure or cotton seed meal is beneficial.

Azalea in Bloom

(PHOTO BY OVERBEY)

7. Red spider and Thrip some times trouble the growers. Frequent syringing of the plant with plain water will usually keep it down. If this does not control spray or dust the plant with sulphur mixture.

AZALEA INDICA, SINGLE FLOWERING, DESCRIBED IN VARIETIES

BRILLIANT—This is a splendid variety of watermelon red. Color of flower is slightly darker than the "Pride of Mobile". It blooms early to late profusely. Leaves small.

BRICK DUST—A low headed bush and very compact grower; size of flower medium to large, light, orange red color; late bloomer; leaves rather narrow.

CRITERION—Rather low compact grower. Flower richly striped with pink on white ground. Leaves narrow, shiny green. One of the best variegated varieties of single flowering azalea. Late bloomer.

DUC DE ROHAN—Flower single, medium size, very pretty salmon pink. Leaves shiny and small. Low headed compact growth.

FORMOSA—A most popular variety. Flowers single and large, lavender. Leaves medium to large. Very thrifty, easiest of all to grow.

GEORGES FRANC—Profuse early bloomer. Flower large flame pink with deep carmine spot near throat. Exceptionally fine, very rare.

HARRY VEITCHII—A beautiful pink flower. Petal is not pointed out so much as the other varieties. Leaves medium, roundish. One of the best pink azaleas but rather slow grower.

INDICA ALBA—Large single, pure white flower. Rapid and upright grower. Very hardy, successfully planted even in Long Island.

INDICA ROSEA MAGNIFICA—Distinct type from the other Indica varieties. Hardy, rapid and upright grower. Foliage very large and thick; sticky secretion from its leaves. Flower single, very large, perhaps largest of all azaleas, white with rose throat, being resembled to some of orchid flowers.

IVERYANA—Flower medium to large. Almost white, leaving only faint pink in stripe. Late bloomer, very hardy.

MAXWELL—Very hardy. Flower large, carmine red. Leaves rather roundish, soft texture and light green when young.

OMURASAKI—Very large single flower, light lavender. Leaves also very large. Vigorous grower.

PRIDE OF DORKING—Flower large, ceries or bright red, late bloomer. Leaves medium, dark green. Hardy, vigorous grower. One of the best varieties.

PRIDE OF MOBILE (Big Leaved Watermelon Pink)—It was known simply as "Big Leaved Watermelon Pink" until a year ago. However, it has now right name, "Pride of Mobile," as this variety not found elsewhere but Mobile and vicinity. It is vigorous grower, well balanced in shape, tall and spreading also. A splendid specimen of this variety could be seen in Spring Hill, Ala., suburb of Mobile, single plant of 12 feet in height covering 100 square feet. In spring, at height of the season, the plant covered, giving no open space, with bright watermelon pink flowers in mass, forming solid ball of pink in enormous size. It stands also against much severer temperature than most of the other Indica varieties can. This is one of the best single flowering azaleas without question.

PRAESTANTISSIMA—Closely resembles to Pride of Dorking, but blooms a week to ten days earlier.

PRINCE OF ORANGE—Flower large, dark orange red. One of the richest colors of all azaleas. Late bloomer. Leaves medium, dark shiny green. Rather low headed with compact growth.

SHELL PINK—Unable to find original name, but known to us as "Shell Pink" commonly called. Flower light pink, blooms very early. It begins to bloom right after Christmas when there is no flower of any kind in garden. Upright growth and not compact.

VITATA FORTUNEI—Flower single, well striped with purplish pink on white ground. Leaves medium, roundish. Vigorous upright growth, not compact. Blooms very early, as early as Shell Pink. Once in a while solid lavender flower appears among this variety. We separate it with utmost care.

VITATA FORTUNEI PURPLEANA—Character and habit same as Vitata Fortunei; only difference is that this variety is solid lavender. It has longer blooming period than all other azaleas, starting to bloom first of all and continues to Complete glory with later flowering varieties.

WILLIAM BULL—Double flower in mud red color. It is very double and resembles to double flowering pomegranate. Exceedingly vigorous and upright grower.

Price of Indica Varieties for delivery before December the first, 1930:

	10	100	1000
3-5 inch in 2½ inch pots	$1.25	$10.00	$
6-8 inch (C) (TT), lath, house grown, B&B	3.00	25.00	
8-10 inch (C) (TT), lath-house grown, B&B	4.00	35.00	

Price of Azalea Indica, delivering after December 1st, 1930:

4-6 inch (C) in 2½ inch pots	1.50	12.00
6-8 inch (C) (TT), lath-house grown, B&B	3.50	30.00
8-10 inch (C) (TT), lath-house grown, B&B	4.50	40.00

Prices on large quantity on application.

HARDY JAPANESE AZALEAS

The following varieties are generally known as Hardy Japanese or Kurume Azaleas. Size of flowers and leaves are generally smaller and slow grower compared with Indica varieties. However, they have more number of blooms usually and far more resisting power against freeze, while they stand merciless hot summer sun in the South, as our experiment shows, being planted in open ground where not a slightest shade to protect them and thrive equally well, if not better, as Indica varieties.

BENIGIRI — Compact upright grower. Leaves small, dull green. Flower small but abundant, deep bright red.

CHRISTMAS CHEER—A real pleasing Christmas red. Small dark glossy green leaves. Hose-in-hose type.

FLAME—Brilliant mud red, very early bloomer. Upright and vigorous grower.

HINODEGIRI--Most popular hardy Japanese azalea. Dwarf compact grower. Leaves glossy green, roundish. Abundant flowers of bright scarlet color. Ideal for pot plant.

MACRANTHA, Single Flowering--Large single clear pink flower. Leaves are small, oblong, dark shiny green. Rather dwarf and very compact. Grower. Even while no flowers on, beautiful evergreen leaves alone most admirable. Very late bloomer.

MACRANTHA, Double Flowering—Large double pink flowers, blooming very late, June, and a few blossoms keep on all summer. Upright grower.

MACROSTEMON—Large single salmon-pink flower at May.

MALVATICA—Light purple flower with roundish, light green leaves.

PINK PEARL—Most noble cherry rose color shading light to center, large full trusses, hose-in-hose type.

YAYEGIRI—Leaves rather thin but very shiny green. Flower salmon red, hose-in-hose type.

PRICES OF HARDY JAPANESE AZALEAS

	10	100	1000
2-4 inch (C), in 2½ inch pots (for delivery before December 1, 1930)	$1.25	$10.00	
3-5 inch (C), in 2½ inch pots, (for delivery after December 1, 1930)	1.50	12.00	
6-8 inch (C) (TT), lathhouse grown, B&B	3.50	30.00	
8-10 inch (C) (TT), lathhouse grown, B&B	4.50	40.00	

MAGNOLIA FUSCATA (Michelia Fuscata)

Well known Southern shrub with handsome compact evergreen foliage and sweet carmine edged yellow flower which has strong banana-like fragrance. One of the very useful plants for Southern landscape gardening.

	10	100	1000
4-6 inch (C) (T)	1.25	9.00	
6-8 inch (C) (T)	1.50	12.00	

MAGNOLIA GRANDIFLORA

Very well known Southern Magnolia. Grandest broad-leaved evergreen in the Southern forests.

3-5 inch (S)	.75	5.00
6-8 inch (S) (T), field grown	1.00	8.00
8-12 inch (S) (T), field grown	1.25	10.00

MAGNOLIA GLAUCA

Southern Bay tree of native forest. Graceful shape of the tree together with large green leaves, silvery white beneath, very attractive.

2-4 inch (S)	.75	5.00
4-6 inch (S)	1.00	7.00

MAHONIA JAPONICA BEALI

Broad holly-like leaves of very thick texture with spiny edges. Bell shaped yellow flower usually in midwinter, being followed by cluster of purple berries. This variety thrives well in the south where Mahonia Aquifolium fails to grow, being burnt. Do well under partly shade.

4-6 inch (S) (T)	1.25	10.00
6-8 inch (S) (T)	1.50	12.00
8-10 inch (S) (TT)	2.00	

MALPIGHIA GLABRA (Barbadoe Cherry)

Low headed evergreen shrub with rosy flowers and red berries. Too tender for the Northern planting, but most suitable for pot plant.

From cutting bed		4.00
4-6 inch (C) (T)		6.00
6-8 inch (C) (T)	1.20	9.00

MYRTUS COMMUNIS MICROPHYLLA

With small leaves and compact growth. Much superior to common myrtus.

6-8 inch (C) (T)	1.00	8.00
8-12 inch (C) (TT)	1.50	12.00

NANDINA DOMESTICA

A pretty Japanese evergreen shrub, grows well in sun as well as in shade. Shape of the foliage and growing habit are entirely different from that of ordinary plants. It is most beautiful sight in winter when leaves turn to beautiful red color and scarlet berries in cluster hanging on.

	10	100	1000
2-4 inch (S)	.75	5.00	
4-6 inch (S)	1.00	8.00	
6-8 inch (S) (T)	1.50	12.00	
8-12 inch (S) (T)	2.25		

NERIUM (Oleander)

This is one of well known shrubs adaptable to outdoor planting in the Gulf Coast region. We have, however, found last number of years that nearly all of them injured by freeze more or less, but only a few distinct varieties passed through with much better condition. We offer you hereby those hardy varieties of our selection, especially SINGLE BUFF and DOUBLE PINK which stood perfectly against unusually severe freeze we experienced last winter. Single Buff, Single White, Double Pink, Double Red and Single Velvety Red.

6-8 inch (C) (T)	1.00	7.00
8-12 inch (C) (T)	1.25	10.00
12-18 inch (C) (T)	1.75	15.00

OSMANTHUS AQUIFOLIUM (O. Ilicifolium)

This is hardiest of all Osmanthus family. Thrives at New York, possibly as far north as Massachusetts. Leaves leatherly-smooth and shiny. Strong spines on both sides of foliage, somewhat resembles to Ilex Cornuta (Chinese Spiny Holly.)

4-6 inch (C) (T)	1.25	10.00
6-8 inch (C) (T), 2 yr.	1.75	15.00
8-10 inch (C) (T), 2 yr.	2.50	20.00

OSMANTHUS FORTUNEI

Similar to sweet olive, but leaves are thicker and armed with dull spine like American Holly. Less flower, but stands much severer cold spell than the other.

2-4 inch (C) (T)	1.00	8.00
6-8 inch (C) (T), 2 yr.	1.75	15.00
8-10 inch (C) (T), 2 yr.	2.50	20.00
10-12 inch (C) (T), 2 yr.	3.00	

OSMANTHUS FRAGRANCE (Sweet Olive)

Well known shrub with bright glossy thick foliage and small white or yellow flowers sweetly scented. A few plants of this kind fill the air of entire garden with high odor during winter and spring.

10-18 inch (C) (TT)	3.50		
18-24 inch (C) (TT)	4.50		
8-10 inch (C), 2½ inch pots	2.25	18.00	

PHOTINIA GLABRA

Our introduction of a few years ago and not as yet known to general public (see the picture taken from one of the parent trees). It is a broad-leaved evergreen, very hardy. Whenever covered with new sprouts mass of burning scarlet, tinted here and there with older leaves of green, will surely convince you that this is one of the best trees ever appeared on the market. There are several different strains in existence; some of them are far inferior to ours. Years ago when we imported the trees from Japan careful selection was made. Out of the many trees imported we picked up the best few specimens for parent trees, eliminating all others. Ours are surely best and true red leaved Photinia guaranteed. It naturally grows 20 feet high with immense white flowers which are also very attractive. It gives most desirable effects when planted between evergreen conifers. It also gives a splendid view as planted individually in the lawn, trimming in any shape you may desire, such as pyramidal, standard or globe. Exceedingly attractive hedges can be laid also with this plant. Adaptable to almost any soil, yet well drained sandy soil seems more suitable than wet clay. It is not so hard to transplant; yet we recommend strongly our potted plants for your safety's sake.

	10	100	1000
4-6 inch from cutting bed		5.00	30.00
6-8 inch (C) (T)	1.00	8.00	60.00
8-12 inch (C) (T)	1.25	10.00	80.00

8-12 inch (C), 2½ inch pots, 2 yr.	1.75	15.00	130.00
12-18 inch (C), 3 inch pots, 3 yr.	2.50	20.00	180.00
18-24 inch (C), 3 inch pots, 3 yr.	3.00	25.00	230.00

PHOTINIA GLABRA

PIERIS JAPONICA (Japanese Andromeda)

Thick shiny leaved evergreen. Grows 5 to 6 feet in height. Drooping cluster of small white flowers early in spring. Best in moisted partially shaded place.

	10	100	1000
2-4 inch (C), 2½ inch pots	1.00	8.00	
4-6 inch (C), very bushy, 3 inch pots	2.00	15.00	

PITTOSPORUM TOBIRA

Very dense compact growth with dark green shiny leaves clustered at end of branches. Most valuable plant for southern gardens.

From cutting bed		4.00	30.00
4-6 inch (C) (T)		6.00	
6-8 inch (C) (T)	1.00	8.00	
8-10 inch (C) (T)	1.25	10.00	

PITTOSPORUM TOBIRA VARIEGATA

2-4 inch, from cutting bed		4.00
4-6 inch (C) (T)	1.00	6.00
6-8 inch (C) (T)	1.25	8.00

PYRACANTHA LALANDI (Yellow Berried)

PYRACANTHA FORMOSANA (Orange Red Berried)

PYRACANTHA S. P. (Tiny Leaves, Bright Scarlet)

PYRACANTHA YUNNANENSIS (Coral)

PYRACANTHA GIBBSII (Scarlet)

Thorny evergreen with cluster of berries at fall and winter. Very attractive, more especially among green foliages.

4-6 inch (C) (T)		5.00
8-12 inch (C) (T)	1.00	9.00
12-18 inch (C) (T)	1.50	12.00

QUERCUS ACUTA

One of the most beautiful evergreen oaks ever introduced from Japan. The leaves large, bright glossy green. Very rapid grower.

6-8 inch (S) (2 yr.	1.00	7.50
8-12 inch (S), 2 yr.	1.25	9.00
12-18 inch (S), 2 yr.	2.00	12.00

QUERCUS LAURIFOLIA DARDINGTONIA

Very handsome form of evergreen or Laurel Leaved Oak. It grows more upright than Live Oak. Suitable to shade tree as well as avenue planting.

8-12 inch (S), 2 yr.	.75	5.00
12-18 inch (S), 2 yr.	1.00	7.00

RAPHIOLEPIS JAPONICA

It grows taller than Ovata. Leaves thick leathery oblong.

RAPHIOLEPIS OVATA

A very desirable low growing evergreen shrub. Leaves oval, thick and leathery. Mass of pinkish small flowers in spring. Persistent through cold weather.

	10	100	1000
4-6 inch (S), 2 yr.		5.00	
6-8 inch (S), 2 yr.	1.00	6.00	
8-10 inch (S), 2 yr.	1.25	10.00	

SERISSA FOETIDA

A low growing evergreen shrub with tiny dark green leaves, yellow margined. Abundant small white flowers. Appearance of the platn somewhat resembles to that of Rock Cotoneaster. Very desirable shrub for border or rock garden. Can not stand too cold.

From cutting bed		3.00
12-18 inch (C) (TT)	1.50	10.00

VIBURNUM MACROPHYLUM

(Sweet Viburnum used to be listed under name of Viburnum Odoratissimum). A valuable evergreen shrub with large green, oblong leaves which turn some times to beautiful red in winter. Small white flower being followed by red berries in cluster. Very hardy and grows in any kind of soil and location. Southern planters ought to use more of these Viburnum varieties for their landscape gardening.

From cutting bed		4.00
4-6 inch (C) (T)	1.00	6.00

VIBURNUM ODORATISSIMUM

(Glossy Viburnum used to be listed under the name of Viburnum Odoratissimum Nanum). Leaves large, oblong with points, polished dark green in color. Its growth is very compact and a little hardier than V. Macrophylum. As it bears berries of coral color it has been known in Japan as coral berried viburnum. This is one of the most promising broad leaved evergreen in the south.

3-5 inch, from cutting bed		4.00
4-6 inch (C) (T)	1.00	6.00
8-12 inch (C) (T)	1.25	

VIBURNUM RHYTIDOPHDLUM (Leather Leaf Viburnum)

Evergreen Viburnum with stout upright branches. Leaves thick ovate-oblong, deeply wrinkled above covered a thick gray or yellowish tomentum beneath. This is hardiest variety in group of evergreen viburnum against cold.

	10	100	1000
4-6 inch (C) (T)	1.50		

VIBURNUM SUSPENSUM (Sandankwa)

Another fine viburnum of Japanese origin. It Somewhat resembles to Macrophylum but much smaller in every respect.

From cutting bed		4.00
3-5 inch (C) (T)		6.00

VIBURNUM TINUS

Small shrub of compact growth with little shiny green foliages.

3-5 inch (C) (T)		6.00
5-8 inch (C) (T)	1.00	8.00

LINING OUT DECIDUOUS TREES, SHRUBS, PALMS, VINES AND MISCELLANEOUS

ALEURITES (Chinese Tungo Oil Tree)

A medium size tree. Large, bright green and deeply veined leaves. Pinkish white flower of large size abundantly in early spring. It bears apple-like fruits with large nut kernels from which famous Tungo oil produced. Annual importation of this oil from China is said to amount several million dollars. Commercial planting of this plant is now going on extensively in Florida and the Gulf Coast States and most promising. However, just a simple ornamental tree we recommend very highly. It is a rapid grower and suitable for shade tree too.

	10	100	1000
1-2 feet (S), field grown	1.00	7.50	60.00
2-3 ft. (S), field grown	1.25	10.00	85.00
3-4 feet (S), field grown	1.75	15.00	125.00

CORNUS FLORIDA RUBRA

Pink Flowering Dogwood.

12-18 inch (G), field grown, bushy	4.50	40.00
18-24 inch (G), field grown, bushy	5.50	50.00

GINKO BILOBA (Maiden Hair Tree)

A most beautiful tree with rapid and erectgrowth. Free from insect diseases. Considerable number of the trees planted in Washington, D. C.

4-6 inch (S) (T)		4.00
6-8 inch (S) (T)	1.00	6.00

HYDRANGEA OTAKUSA

Old reliable grower and only variety thrives well in the South for outdoor planting.

6-10 inch (C) (TT), bushy 1.25

LARGERSTROMIA INDICA (Crape Myrtle)

One of the most favorite flowering shrubs of the south, although it is rather too common. Hardy and heavy bloomer for long period. It paints landscape in summer with its brilliant blossoms in tones of many different shades, being called "Southern Lilic". As avenue trees considerable planting has been going on last several years and demand growing year after year very rapidly. We

offer this season the following colors: Crimson, white, lavender and dwarf crimson.

	10	100	1000
6-8 inch (C) (T)	.50	4.00	
8-12 inch (C), field grown	1.00	8.00	
12-18 inch (C), field grown	1.25	10.00	

MAGNOLIA SOULANGEANA

Chinese Saucer Magnolia. Flower, white with rosy pink at base of petals. It blooms in profusion before leaves appear.

MAGNOLIA SOULANGEANA NIGRA (M. Liliflora)

Flower of lily shape in darkest purple at outside and creamy white at inside. It blooms slightly later than Soulangeana.

8-12 inch (G), field grown, 1-2 branches	6.00	50.00
12-18 inch (G), field grown, 1-2 branches	8.00	70.00
18-24 inch (G), field grown, 1-2 branches	10.00	90.00

For larger sizes see under "specimen."

MALUS BECHTEL (Double Pink, Slow Grower)

10-12 inch (G), field grown	2.00	15.00
12-18 inch (G), field grown	2.50	20.00

MALUS FLORIBUNDA (Single Pink)

MALUS NIEDZWETZKYANA (Red)

MALUS SPECTABILIS (Double Pink)

MALUS EXCELENCA THELL (Weeping, Pink)

12-18 inch (G), field grown	2.00	15.00
18-24 inch (G), field grown	2.50	20.00

SAPIUM SEBIFERUM (Chinese Tallow Tree)

12-18 inch (S)	1.00	8.00

SPIREA BILLIARDI

Upright grower. Compact with excellent foliages. Blooms in profusion of bright rose in narrow, long panicles. It blooms nearly all summer long.

6-8 inch (C) (T)	4.00

SPIREA PRUNIFOLIA PLENO

Double flowered Bridal Wreath

4-6 inch (C) (T)	3.00

SPIREA THUNBERGI

	10	100	1000
6-8 inch (C) (T)		3.00	

VITEX NEGUNDO (Blue Chase Tree)
With long petiolate divided leaves and blue flowers blooming nearly whole summer. Far preferred in the south to Butterfly Bush as it resists root knot and heat. It has strong aromatic odor.

6-8 inch (C) (T)		4.00

BIGNONIA SPECIOSA
An evergreen vine with glossy leaves. Flowers in cluster, large purple.

8-10 inch (C), 2½ inch pots	1.00	8.00

EUONYMUS RADICANS (Winter Creeper)
A fine evergreen creeper with small shiny green foliage. Very hardy.

6-8 inch (C) (T)		3.00
8-10 inch (C) (T)		5.00
10-12 inch (C) (T)	1.00	7.00

EUONYMUS RADICANS ARGENTO-MARGINATUM
Similar to the above but with foliage beautifully variegated in green and creamy white.

4-6 inch (C) (T)		6.00
6-8 inch (C) (T)	1.00	8.00

EUONYMUS KEWENSIS (Baby Winter Creeper)
Slender thread like vine with very tiny green foliage. One of the cutest creepers in existence. Suitable to covering stumps and rock piles and very plant for miniature garden.

4-6 inch (C) (T)		4.00
6-8 inch (C) (T)	1.00	6.00

FICUS REPENS (Climbing Fig)
Though it is not very hardy, one of best climbers, if not the best, known in the South, to cover stone or brick walls as well as rocks.

10-15 inch, 3 inch pots	.75	6.00

Shipped by bare root as it grows very easily and safe.

HEDERAHELIX (English Ivy)
We have two kinds of stock. One big leaved and the other small. Specify when you order which one you prefer.

8-10 inch (C) (T)	.75	5.00
8-10 inch (C), 2½ inch pots	1.00	6.00

KADZURA VINE

Evergreen trailing viney plant with thick leathery foliage which is dark glossy green in color. Flower is whitish rose but small and not showy. However, when clusters of scarlet berries ripen in autumn contrast with the dark green lustrous persistent leaves presents a most attractive effect. It is not very hardy and not recommendable for outdoor planting with exception of Florida, California and warm sections of the Gulf Coast. Yet we strongly recommend as a pot plant or for conservatory setting.

	10	100	1000
4-6 inch (C), 2½ inch pots	1.50	12.00	

TRACHELOSPERMUM JASMINOIDES (Star Jasmine)

Finest vine to cover arbor, pagoda or screen. Leaves roundish oval, thick shiny green. Star shaped white flower very fragrant. Grand is the view when fully bloomed. If properly trained this is better pot plant than English ivy.

4-6 inch (C) (T)	1.00	6.00
12-18 inch (C) (T)	1.50	12.00

CANNA

King of Humbert Red (Red)	2.50
Apricot (Apricot)	3.50
Flame Bean (Yellow)	2.00
President (Bright Red)	2.25
Nokomis (Dark Red)	3.50

Above varieties assorted, $2.75 per 100

HEMEROCALLIS (Day Lily)

Small Division	2.50
Medium Division	5.00

COCOS AUSTRALIS (Pindo Palm)

One of the hardiest palms with its graceful shape with grayish green, curved pinnate leaves.

8-12 inch (S), 2 yr.	1.00	8.00

CYCUS REVOLUTA (Sago Palm)

12-18 inch (S), 3 yr. 2.50

OPHIOPOGAN JAPONICA

Dwarf evergreen grass, thrives well in shady place where no other plants can grow.

Small Division	2.00	15.00
Medium Division	3.00	25.00

OPHIOPOGON JABURAN AUREA VARIEGATA

A most beautiful and useful plant as house plant, also as border outdoor in the south. Its deep violet-blue flowers freely produced in dense spike nearly all summer are invitable. Deep blue berries about the size of currants show excellent contrast to the drooping broad grass-like leaves striped with green and creamy white.

	10	100	1000

SPECIMEN PLANTS

Plants under this heading are growing in the field, twice or more transplanted or roots pruned, compact symmetrical shape of being sheared or pinched. As they are growing on our well drained high land and have abundant fiberous roots they suffer therefore much less from transplanting. Dig them with utmost care of our skilled laborers, balled and burlapped or puddled with clay immediately, so to take no risk of root getting dry. If so desired plants may be shipped without B. & B. (balled and burlapped). Prices listed here include charges of B. & B. unless otherwise mentioned. Packing charges are extra at cost, if order not accompanied with cash.

50% discount on B. & B. stock for carload order or order delivered at our nursery ground without boxing, with exception of those marked ("‡") which allowance is 20%.
